

ABBE GRANT

awarded to

Anne Josiane Kouam Djuigne

for participating in the **11th Heidelberg Laureate Forum**,
held in Heidelberg, September 22–27, 2024.

Ernst Abbe (1840-1905) was a physicist, inventor, entrepreneur and social reformer. Together with Carl Zeiss and Otto Schott, he created the foundations of modern optics. After the death of Carl Zeiss, Ernst Abbe founded the Carl-Zeiss-Stiftung in 1889. Abbe's life's work represents a combination of scientific knowledge with successful entrepreneurship and a high level of socio-political responsibility. Today, the Carl-Zeiss-Stiftung is one of the largest and oldest science-promoting foundations in Germany and the sole owner of Carl Zeiss AG and SCHOTT AG. As a partner of excellent science, it promotes basic research as well as application-oriented research and teaching in the STEM disciplines.
